

Video scoreboard in Multifunctional halls

every match is a final ...

LED Video display system

A modern, full coloured LED video display provides information service at highest level. The splendend text presentation and ideal colour blending, which is necessary for result service, is based upon:

- 3 - 10 mm real pixel distance,
- SMD light-emitting diodes with red, green and blue LED's,
- ideal colour blending already at small viewing distance.

Normal use as multi-sport scoreboard as well as high quality colour graphics and advertising- or live video, all in outstanding quality with up to 50 Mio colours.

Match control software

The scoring software "Match-Control" includes layouts for the scoreboard and operation according to the rules for the following sports:

- soccer
- hockey
- beach volleyball
- handball
- tennis
- baseball
- volleyball
- badminton
- List of team players
- basketball
- icehockey
- scorers

The scoring is made only at the clear Windows software with an additional external button for the clock.

The combination of a full matrix scoreboard and the pure PC solution for scoring creates for the first time complete liberty with respect to changes of rules and desired information on scoreboard.

A well thought out and flexible concept, which guarantees future security for each customer.
